"COMPLETE AND CONVENIENT."—T. M. COOLEY.

BAKER'S ANNOTATED CONSTITUTION OF THE UNITED STATES.

The aim of the ANNOTATED Constitution of the United States is to furnish to the bar a complete Digest of the decisions of the Supreme Court of the United States, wherein is called in question any of the provisions of the Constitution, arranged under the heading of the several articles, sections and clauses upon which decisions are predicated, thereby making a complete and ready reference to the case, and giving the exact point decided in each case so as to save the labor of searching through numerous and long opinions to find the exact question desired. This work has been prepared, not by using the syllabus of the reported cases, but by carefully reading the reports and digesting all the cases. This extraordinary labor was an actual necessity, as the compiler found numerous cases decided by the Supreme Court of the United States which involved grave Constitutional questions that are not referred to in the head notes.

WHAT IS SAID OF IT.

From HON. MELVILLE W. FULLER, Chief Justice of the United States: "The work of the editor appears to have been well and conscientiously done, and I think the volume will be found exceedingly useful for ready reference to the decisions."

From HON. JAMES H. ROTHROCK, Justice of the Supreme Court of Iowa: "I have examined with some care the 'Annotated Constitution of the United States,' by A. J. Baker, late Attorney-General of this State, and take pleasure in saying that it is a most admirable work. The notes, or digest of cases, are a correct condensation of the points determined in the opinions cited, and are so arranged that all of the decisions of the Supreme Court of the United States, under any section of any article, can readily be found. In my opinion the work will be a very great aid to the profession, and is a production worthy of the distinguished author."

From D. W. SANDERS, Louisville, Ky.: "I have had occasion to examine your book entitled 'Annotated Constitution of the United States' in a number of instances, and have been delighted with the thorough manner in which you have done your work. I think it a great contribution to the legal profession, and one which entitles you to the thanks of any member of the bar whose professional engagements require an examination of constitutional questions in connection with the decisions of the Supreme Court of the United States. Your work has been subjected to a thorough and critical test, not only by myself, but by members of the Kentucky bar who are distinguished in their profession."

The work contains a reference to all cases decided in the United States Supreme Court wherein any Constitutional question is involved, with a statement of the exact point decided, also a reference to similar questions decided by the various Circuit Courts which have not been carried to the United States Supreme Court.

There are 236 pages besides the Index, Table of Contents, and the Appendix, wherein is the Declaration of Independence, Articles of Confederation, and a united copy of the Constitution.

4 THE BIG FOUR. 4

It is an acknowledged fact that the most important, as well as the most lucrative, branch of litigation is that of Corporation Law, and it is desirable that every practitioner interested in this subject should know that the Second Edition of "Cook on Stock, Stock-Holders and Corporation Law" is the latest, most comprehensive, and most exhaustive work on Corporation Law. This treatise is written in the belief that the standpoint of the stockholder is the proper standpoint from which to study general Corporation Law. This item is valuable to attorneys who at present may not have cases in Corporation Law, but wish to prepare themselves for that opportunity of betterment which comes to every professional man. Corporation Law is growing, and litigation on the subject is endless and profitable. Mr. Cook's work is complete, in one large volume of over 1000 pages; \$6.50 net, or \$6.75 postage paid on receipt of price.

"Sutherland on Statutes and Statutory Construction" is a new and valuable treatise on an important subject. "The Current Comment and Legal Miscellany" closes its very favorable review of this work by saying: "It is the most scientific and exhaustive work upon the subject of Statute Law that has appeared in recent years, and can safely be recommended, not only as the newest, but also the most scholarly, comprehensive, and accurate work upon the subject of Statute Law." One large volume. Price: \$6.00 net, or \$6.25 postage paid on receipt of price.

"Cobbey on Replevin" is a complete treatise on the law of Replevin as administered by the American and English Courts, with nearly 11,000 citations, and giving universal satisfaction to its thousands of purchasers. Price: \$6.00 net, or \$6.25 prepaid.

"Mechem on Agency," including a general discussion of the subject, with special chapters on Attorneys, Auctioneers, Brokers and Factors, is a book with a wider scope than any other work upon the subject. Price: \$6.00 postpaid on receipt of amount.

These four books we especially desire to call your attention to and recommend particularly to our customers. THEY ARE MONEY-MAKERS AND TIME-SAVERS. Will be glad to supply circulars, with Table of Contents, on application.

CHASE'S BLACKSTONE.

Commentaries on the Laws of England, in four books, by Sir William Blackstone, Knight, one of the Justices of the Court of Common Pleas; so abridged as to retain all portions of the original work which are of historical or practical value. By George Chase, LL.D., Professor of Municipal Law in the Law School of Columbia College, New York City. Third Edition. 1168 pp. 1890. 8vo., Law Sheep. \$6.00 net.

The special additional merits of the Third Edition are as follows:

1. The notes are copious, and the aim has been to make them as clear, systematic, and comprehensive as Blackstone's own text. Many of them have been entirely re-written, so as to embody in them the latest English and American decisions and statutes. Topics too meagrely treated by Blackstone, as Master and Servant, Easements, Fixtures, etc., are here fully developed. The citations are more recent than those to be found in any other edition of Blackstone, and include valuable American decisions from all parts of the country.

2. Important appendices have been added for the special advantage of students. These include a Glossary, defining and explaining words and phrases used by Blackstone, which have a peculiar or technical meaning; a translation of the passages from the Latin, French and other languages, which are found scattered through the Commentaries in great numbers; a full table of English, Irish, Scotch and American Law Reports, with the usual abbreviations referring to them, a Table of English Regnal Years, to show when the various English statutes, cited in the text, were enacted, etc. The Translation fills twenty-five large pages and will be found of special value by students unacquainted with Latin, French, etc., while those whose knowledge of these languages is limited, or has become more or less a faded remembrance, will also find its aid serviceable.

3. Since the first edition was issued, a new and much fuller Index has been added to the work.

Notes upon Lecture XII. XIII—Supplementary: Subjects not discussed elsewhere. Appendix I—The Constitution of the United States. II—Articles of Confederation—1777. III—Resolutions offered by Mr. Randolph. IV—The Pinckney Plan.

Hon. J. C. Bancroft Davis has printed Judge Miller's lectures as they came to him, adding a short note to each of these lectures, which in each case will explain itself. He has supplemented a chapter containing references to minor provisions of the Constitution, not discussed in the lectures, and an appendix containing (1) a collated copy of the Constitution with full references to the cases in which it has been construed or discussed; (2) a collated copy of the Articles of Confederation; (3) copies of the Randolph draft for a Constitution and of the Pinckney draft for the same which were submitted to the Convention, May 28, 1787, both of which proved to be of substantial use in the discussions which followed in the Convention.

NOT A CLASSIC.

Rice on Evidence is not a classic—not juridical history or metaphysical refinements—but a working tool; modern decisions, the rules which will govern in the case you try this term—where a mistake, an effete rule, an obsolete dictum, gives a new trial to the other fellow.

This wins cases—your facts fully shown with no sustainable objection to the way you do it. The latest, the best help in this line pays for itself the first time used.

Two volumes, 1700 pages, 13000 cases studied. Paper, presswork and binding are the best.

AN ESTABLISHED FACT.

ANDERSON'S DICTIONARY OF LAW

Combines in its one large, unpadding volume both the best Law Dictionary and the best Commentary on Law hitherto produced:

Judges, practitioners, professors, editors, writers and publishers declare it.

It is not (1) a work on heraldic, numismatic, metrical, agricultural, horticultural, botanical, geographical, chronological, ethnographical, physiological, pathological, metaphysical, ecclesiastical, ecclesiological, ornithological, piscatorial, zoological, and like nomenclatures.

It is not (2) a chronicle of the Middle Ages.

It is not (3) a Latin or an Anglo-Saxon Grammar.

It is not (4) a lexicon to the dead languages.

It is not (5) a glossary to dismembered foreign phrases.

It is not (6) a compilation on Roman, Norman, Albion, Welsh, Scandinavian, Spanish, Mexican, Persian, Chinese, and other antiquities.

It is not (7) a necrological directory.

ON THE CONTRARY

It is (1) an exhaustive Dictionary of the technical terms found in the text-books and reports which lawyers, judges, and students consult.

It (2) **sets forth** common and peculiar expressions found in wills, deeds, agreements, codes, constitutions, etc., which the courts have construed.

It (3) **gives** the origin of technical terms, (4) correct pronunciations, (5) synonyms and antonyms.

It (6) **translates**, both literally and liberally, the useful law maxims, and (7) **illustrates** their meaning and application from thousands of cases.

It (8) **states and expounds**, at length, the principles which constitute "the law" itself in its numerous branches, as a theoretical and as an applied science.

It (9) **contains no repetitions**, in any guise, but discusses each subject *once*, in its best place, with many cross-references from others.

It (10) **bases its definitions and deductions** upon 30,600 citations of decisions, text-books, law periodicals, codes, statutes, constitutions, etc.

It (11) **prefers** Blackstone, Story, Kent, Greenleaf, Bishop, Cooley, Wharton, and Pomeroy to Bracton, Fleta, Spelman, Fortescue, and Loft; and the United States Supreme Court reports to the Year Books.

It (12) **furnishes** names of parties, year of decision, and page of opinion.

It (13) **is finely printed** on the best paper, the **DICTIONARY** in Brevier, the **COMMENTARY** in Nonpareil, with the citations, in the smaller type, in foot-notes.

As a comprehensive, practical, well-considered, reliable modern

work, it has no equal.

"We unhesitatingly indorse it as the most accurate and complete Law Dictionary. The style and manner of its preparation could not be improved upon. No legal word, phrase, or subject seems to have been omitted. It contains exhaustive references, and is accurate in every regard."—CENTRAL LAW JOURNAL.

"As a Law Dictionary it is without comparison; as a book of reference, unequalled. With it alone the practitioner can prepare a brief from the latest and best cases. It is a great work."—CHICAGO LAW JOURNAL.
